

## Laerdal Paediatric Pocket Mask

- Circular mask assists with correct placement.
- Transparency allows for visualization of nose and mouth.
- Same popular one-way valve as the Laerdal Pocket Mask diverts exhaled patient air.
- Increased distance from patient allows for clear view of chest rise and fall.
- Soft pouch includes a belt loop and loop clip.
- Latex-free.
- Easy to clean for repeated manikin training.

### Includes

One-Way Valve, Soft Silicone Mask, Gloves and Anti-Microbial Wipe packaged in an attractive and versatile Soft Pack.

### Ordering Information

- 82 00 50 Laerdal Paediatric Pocket Mask in Soft Pack w/One-Way Valve, Gloves and Wipe
- 82 04 10 One-Way Valve replacement (single unit)

designed with infants and children in mind

## Laerdal Paediatric Pocket Mask

Infants and children are not just little adults.

They have unique anatomical features that require unique resuscitation equipment. The Laerdal Paediatric Pocket Mask is designed to meet the mask seal challenges often found with infants and children. It also affords the rescuer added protection and distance from the patient's exhaled air.

*The Laerdal Paediatric Pocket Mask.... a small addition to the growing family of Laerdal ventilation barrier devices.*
